Product Description

Outdoor Sport Injured Arm Support Triangle Bandage First aid kit wrap Emergency
Triangular Non-woven Bandage 96X96X136cm

Triangular bandage is a convenient dressing material, can also be used as a splint, dressing and substitute for tourniquet, but also suitable for the shoulder, chest, groin and buttocks and other areas that are not easy to wrap. The purpose of the triangular bandage is to protect the wound, reduce infection, compress bleeding, fix the fracture, and reduce pain.

Features

- * Can be used as a sling for broken arms or dislocated shoulders
- * Can be used as tourniquet to help control severe bleeding
- * Holds gauze in place and can be used as a trauma pad
- * With multi-functions & several applications, usually used to fix immobilization splints to limbs.
- * Widely used in first-aid training
- * Bleached / unbleached

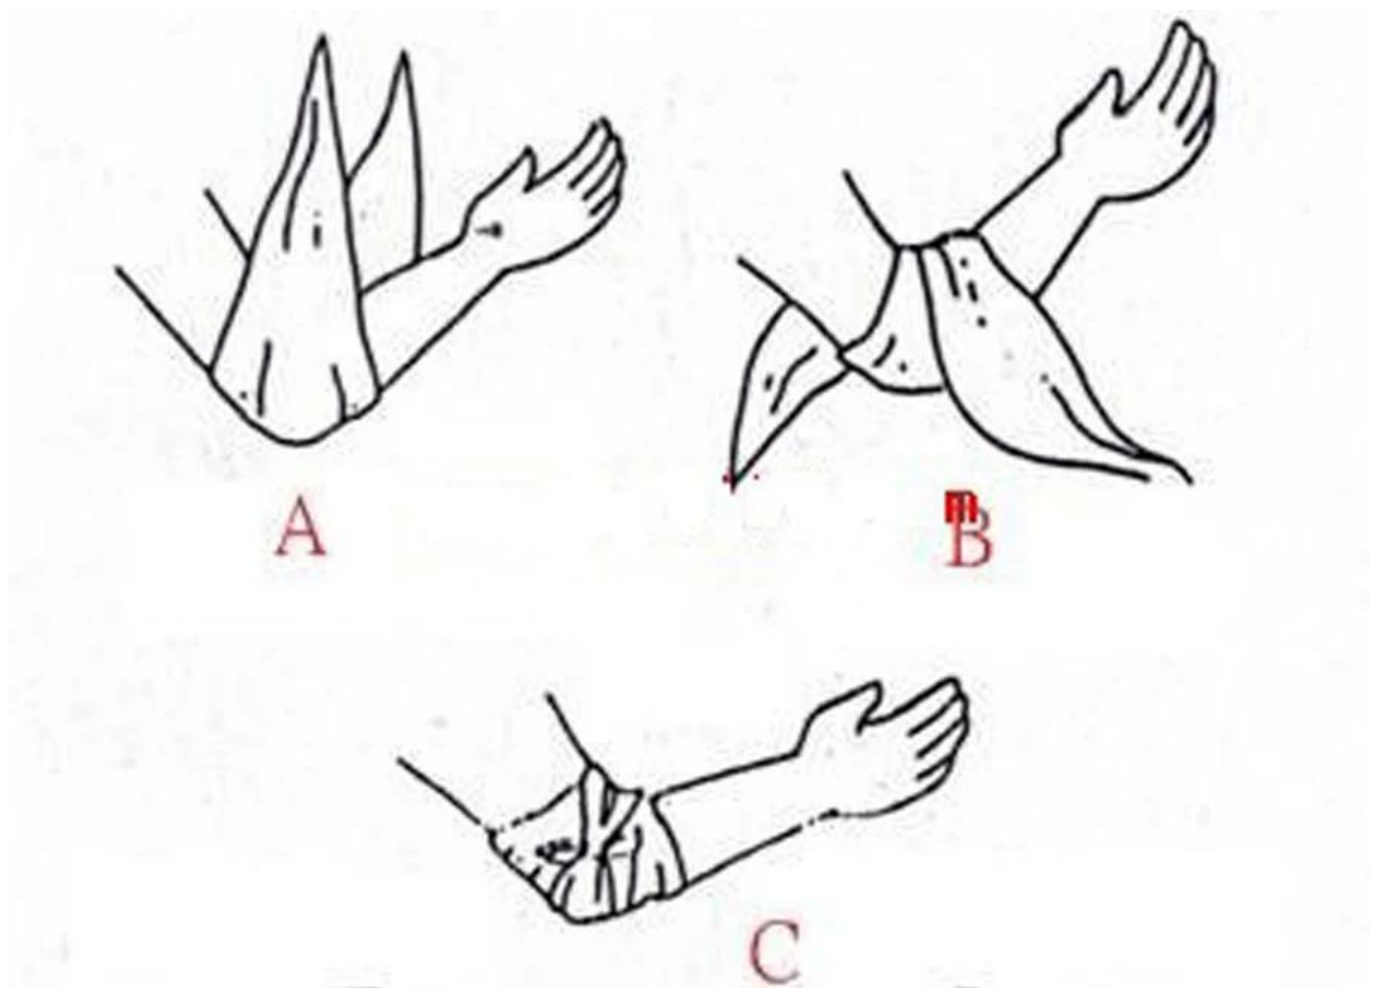

The [triangular bandage](#) is particularly suitable for a variety of large-area wound dressings, irregular wound of body parts

A sling medical bandage can be folded in the shape of a rectangle. It can be placed over a

large wound to absorb blood and stop bleeding, functioning as a trauma pad. Two sling medical bandage can be used together to treat a wound. One can be used like a trauma pad to control bleeding, and another can be used to wrap the wound. It can hold the trauma pad in place if first aid tape is not available. A sling medical bandage can also be used to treat a wound on the forehead or the top of the head. It should not cover the eyes, nose, or mouth. A bandage should not be used around the neck because it could restrict blood flow to the head.
