- 4.Accord with the hygienic standards.
- 5..Providing reliable barriers to water stem and other fluids.
- 6.Designed To Maximize Comfort
- 7.Breakaway design for easy removal
- 8.Can be used as a visiting suit.

Product descriptions:

Item	White Waterproof Breathable Coverall With Hood
Material	Nonwoven and microporous PE film
Color	White
Cuffs	Elastic cuffs
Style	With hood
Application	For medical,hospital,pharmaceutical, laboratorial, clean room, food/electronic/chemical workshop and industrial sectors.

Material Feature:

Microporous fabric is a polypropylene membrane that is thermally laminated to a polypropylene nonwoven.

It contains pores with a diameter of less than 2nm (nanometres), making them too small for most solid particles, liquids and even viruses to pass through (most viruses are in the range of 20nm to 500nm in diameter).

This provides excellent protection against harmful liquid substances and hazardous particles.

The laminated outer surface is smooth, which reduces the risk of attracting and retaining micron-sized particles, making it suitable for use in hygiene environments.

This fabric still allows gases to penetrate, so it is breathable, thus making it more comfortable to the wearer than other materials offering similar protection.

Applications:

- *Epidemic and virus
- *Pharmaceutical and cosmetic industry
- *Nuclear industry
- *Asbestos removal and abatement
- *Fog of Paint spraying
- *Phytosanitary treatment
- *Handling toxic powders
- *Low level insecticide and pesticide spraying
