

Disposable Bamboo Manicure Stick for Nai Care

[Manicure stick](#) is a kind of nail care tool used for cuticle removing and nail cleaning. LY manicure stick is made of quality bamboo from origin. It has two different shaped ends for different purposes. One is spade-shaped for cuticle removing and the other pointed shape for nail painting.

Manicure sticks are usually used in nail salon, but you can also do the nail care at home with it. Compared with other materials, bamboo is cleaner and more environmental friendly. As a disposable material, you don't have to face the mess after use. And one-time use avoid cross infection between people, which makes the process safer. As bamboo can grow to it's full size in a few years, the material is much friendly to the environment.

Multifunctional stick, used in nail cleaning, nail taking off and rhinestone applying.

设计理念
DESIGN

The spade-shaped end

This end can be used as cuticle remover. Apply softener to the nail, push the cuticle to the root of nail, then cut it with a cuticle nipper.

Quality bamboo material, softer than steel or plastics.

产品材质 MATERIAL

The pointed end

Dip the pointed end into the water and then use it to pick the rhinestone, sequin or other accessories. Take a quick dip in the glue and put the stick to the place you want.
