

Functions:

1. [Hair remover](#), the whole body hair.
2. Pigment removal, age pigment, freckle, chloasma and other pigmentations.
3. Acne treatment, all kinds of acnes.
4. Blood vessels removal, congenital red blood, shifting skin red blood.
5. Skin rejuvenation, pore shrink, blackhead removal
6. Wrinkle removal, lift firming, body contouring
7. Dispel black rim

Product details:

Item	Hair Removal and Skin Rejuvenation IPL Machine
Type	IPL
Style	Stationary
Handle tool	Double handle tool(532nm-950nm, 640nm-950nm)
Light spot area	10mm*50mm*2
Energy density	1-50J/cm ² , stepping 1J
Light interval	2-5s(adjustable), stepping 1s
Input power	1200w or less
Pulse number	1-6(adjustable), stepping 1 pulse
The first pulse's width	25ms
The whole pulse width	150ms
Subpulse's width	25ms
Pulse interval	20ms
Screen	10.4 or 8.0 inch color intelligent touch screen
OSD Language	Chinese, English, and Korean
Cooling method	Circulation cooling with the internal distilled water, air cooling, and semiconductor refrigeration
Working voltage	110V+ 10%, 50Hz
Insurance specification	Max 10A

Advantages:

1. Adopt imported gem crystal light system, make the cooling performance better, more comfortable and more durable
2. Semiconductor cooling system from Italy, give -10 degrees to surface skin.
3. Multifunction: Hair Removal, Skin Rejuvenation, Pigment Removal, Blood Vessels Removal, Wrinkle Removal
4. Therapy probe designed according to human engineering, smaller and more convenient, help the operators work more comfortable

- 5. Use the U.S.A eight times atmospheric pressure light source
- 6. Shell material adopted ABS, make it more safety
- 7. Three cooling systems (semiconductor, water and wind) and exposer resin make it more scientific

Packaging&delivery:

Packaging	1.Styrofoam 2.Fumigation wooden case 3.Air Box
Delivery	Based on your order quantity
