Product introduction:

The reusable surgical gown is a medical product that is the first to use advanced imported multi-functional composite fabrics in China. It has excellent functions of waterproof, anti-blood, anti-bacterial, low-fiber waste, anti-static and high-temperature and high-pressure steam sterilizing. This surgical gown is from the one-way protection of patients from infection to the two-way protection of doctors and patients a revolutionary breakthrough, can effectively control the occurrence of cross-infection between doctors and patients.

Reusable surgical gown advantages:

1, conform to the standards of Class II medical and health materials, the authority of the State Food and Drug Administration quality inspection department inspection, product performance is better than the national standard, reaching the national leading level

2, cleaning and sterilization, can use chemical disinfectant soaking, high pressure steam sterilization
3, Life: According to the normal washing procedures, after 70 cycles, the water-resistant bacteria still meet the national standards.
